Professional Summary

MCA candidate with internship experience in Quality Assurance and a strong interest in Data Analytics. Skilled in Advanced Excel, Power BI, SQL, and data-driven problem-solving. Experienced in analyzing defects, documenting findings, and collaborating with cross-functional teams. Passionate about transforming data into actionable business insights.

Experience

Whatbytes

November 2025 - March 2026

Manual QA Tester Intern

Remote

- Wrote and executed 50+ manual test cases for web application features.
- Analyzed application behavior, identified and documented 30+ defects using JIRA, enabling faster issue resolution through detailed root cause documentation.
- Performed smoke, regression, and cross-browser testing to ensure product stability and release quality.
- Logged, tracked, and verified defects while collaborating with developers to improve product quality and release stability.

Skills

Data Analytics: Advanced Microsoft Excel, Power BI, Google Sheets, SQL.

Testing Skills: Manual Testing, Functional Testing, Smoke Testing, Regression Testing, Cross-Browser Testing, UI Testing, Usability Testing, Test Case Design, Bug Reporting, Defect Life Cycle, STLC, SDLC.

Tools: Google Workspace, JIRA, Postman, VS Code, Git, GitHub, HTML, CSS, JavaScript.

Projects

Supermarket Sales Analytics Dashboard 🌐

Power BI, Excel

- Built an interactive Power BI dashboard to analyze supermarket sales performance using transactional sales data.
- Cleaned and transformed raw data using Power Query and created an optimized data model for analysis.
- Designed KPI cards to monitor Total Income (INR 31.43K), Total Quantity Sold (11K), and Average Customer Rating (6.99).
- Created 6+ interactive visualizations including KPI cards, bar charts, pie charts, donut charts, line charts, tables, and slicers to analyze sales trends.
- Enabled dynamic filtering using slicers, allowing users to explore business insights across multiple dimensions.
- Derived insights into product performance, customer preferences, and city-wise sales trends to support data-driven decision-making.

OpenCart Manual Testing Project 🌐

Manual Testing, STLC, OpenCart

- Conducted end-to-end manual testing of an OpenCart E-Commerce application, covering modules such as Login, Registration, Search, Shopping Cart, and Checkout.
- Designed Functional Requirement Specifications (FRS), test scenarios, test cases, Requirement Traceability Matrix (RTM), and defect reports following the Software Testing Life Cycle (STLC).
- Performed functional, positive, negative, UI, and input validation testing, executed test cases, logged defects, and prepared test summary reports to ensure application quality.

Agency Website (CodeCrafter Web) 🌐

Next.js, TailwindCSS

- Designed and developed a modern, responsive website for a web development agency to effectively showcase its brand, services, and technical capabilities to potential clients across various industries.
- Created engaging service sections, interactive UI components, and a visually rich portfolio display to highlight past projects, attract leads, and build trust with visitors.

Education

Jain University(Online)

July 2025- May 2027

Masters of Computer Application

Parul University

July 2022- May 2025

Bachelors of Computer Application

CGPA: 8.01
